

# HOW TO START HOMESCHOOLING

when you don't know what to do

## START HOMESCHOOLING WITH THESE 5 BASIC STEPS

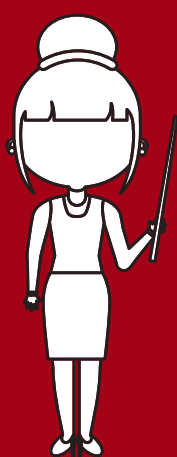

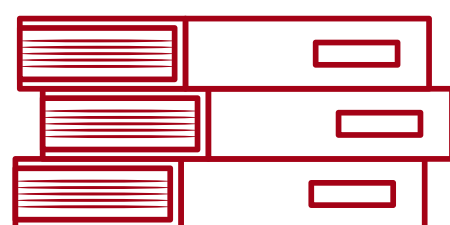

### REGISTER TO HOMESCHOOL

- Privately homeschool keeping your own records (each state has unique requirements)
- Homeschool through a public school option (like a charter school)

\*options vary by state, check out HSLDA.org for more info

### CHOOSE YOUR CURRICULUM

There are an incredible number of curriculum options available outside of the state standard curriculums of public school. You can find something that covers every subject and every grade, or you can pick and choose curriculum you prefer for each subject.

### FIND EXPERT SUPPORT

Homeschooling is not new. There are experts out there who provide information on homeschool styles, curriculums, and methods. Attend a homeschool conference! They are a wealth of information.

### PLAN YOUR HOMESCHOOL

This is the fun part! Plan the way that suits you best. Make detailed plans for the whole school year, or loose plans for the month. Then, setup your homeschool space whether it's a nook or a whole school room.

### FIND A COMMUNITY

Children and parents need a community, especially when homeschooling! Communities provide support, resources and help from people you grow to trust. Get plugged in online and to a local group!
